

Southwest Missouri Wants New Primary Road to Tap the Oklahoma Highway

SHOW ME FOLKS WANT REAL ROAD

Citizens Opposed to Plan to Route the Road Via Joplin

CONDEMN AIR LINE

Greater Population Would Be Served by Touching Arkansas-Oklahoma

Special to The World.
MONETT, Mo., June 3.—Southwestern Missouri towns along the proposed Capital highway from Springfield to Monett, and thence to Joplin, Ark., and Seneca, Mo., contend the only feasible route for the southwest Missouri state primary road is through the territory outlined by the Capital Highway commission.

The Springfield-Joplin combination, which includes an "airline" from Springfield to Joplin, is working for a primary road, which leaves Springfield and runs 57 miles before it reaches a town. Along this route there is no population, no telephone connection, no garages, nothing for the traveling public.

Air Line Would Aid Few.
This road, said to be fostered by politicians, would be used for a race track and not for a public road to benefit Missourians, as the law requires that the primary highway to be on a highway that has been designated by this state. This is the only highway that could be built between Springfield and Joplin.

The proposed Mount Vernon road runs south and below Carthage, turns north six miles, back into Carthage. Engineers do not believe that a road should be built 12 miles just to reach Mount Vernon. The Mount Vernon road does not reach Joplin direct.

Now for the Monett route which runs 50 miles south from Springfield. This serves a population of 15,000. Small as Monett is, it has a suburb that has as much population as the entire 57 miles from Springfield to Carthage.

Beautiful Sight to See.
What does the tourist see as he travels from Springfield to Monett? Apple orchards, as fine as he sees anywhere, peach orchards, strawberry fields, grape vineyards, wheat fields, chicken ranches, dairy herds—in fact a diversity of crops and animals that is pleasing to the eye and restful to the mind.

Asks Good Road Men.
"After we leave Monett we connect at Seligman with two Arkansas roads—one to Fort Smith through the apple orchards of the world in Benton and Washington counties, one to Little Rock via Eureka Springs. We serve a population of 6000 from Monett to Seligman, a distance of 33 miles.

The direct line boosters dwell upon "The Ozark" and then they want a road that will barely touch the Ozark on the extreme west side and wander off into Oklahoma. By building the road on the Monett route it will reach the heart of the Ozarks on the extreme west side Arkansas and Oklahoma. Build a road from Springfield to Seligman, and Monett to Seneca and it reaches every foot of the Ozarks.

Main Road to Ozarks.
"That is where tourists are going—into 'The Ozark Playgrounds'—The Land of a Million Smiles." Build roads so they can get there.

"We should Jasper county have all the roads. Should they have all their byways concreted and paved before 75 per cent of the state has a single state road? They have been getting all the state aid, federal aid and federal machinery. Why should Springfield stop them from continuing the program? Shall Missouri build her primary highways to accommodate the Lakeside or continental tourists—and the population of Missouri who pay the taxes?"

RICHER, June 3.—The project of completing the Baxter-Miami section of the hard surface road from Oklahoma City to St. Louis received a large share of attention at the regular meeting of the tri-state section of the American Zinc Institute held here. Good roads enthusiasts from Joplin, Miami and Baxter were present and participated in the discussion. Mine operators from the surrounding district in attendance were also sounded on a plan to increase economic efficiency.

Another New Oil Town.
Slick, June 3.—It is difficult to keep informed on the new town developing in Slick territory of Creek county. Robertsburg was recently established, and now another town is springing up near the Rock and Oil company quarter. It will be called Thompson. It is eight miles northeast of Slick.

Find Bodies Buried 1,800 Years.
The stroke of a pick gave first notice of the find, and search brought to the surface a Gallic-Roman stone coffin. Within it was the body of a young woman, perfectly preserved, the flesh as it was the day of her death. Other bodies were disinterred and in one tomb were found fruits showing but little signs of shriveling and a tree branch still showing signs of green—Embalmers Monthly—Advertisement.

The United States senate committee on reconstruction and production estimates that the yearly motor vehicle mileage of this country is 1,000,000,000 and that 1,400,000,000 tons of freight are transported in this way annually.

CRIPPLES ARE TO GET AID

Rotary Club of Vinita Will Care for Craig County Unfortunates.
Special to The World.
VINITA, June 3.—The Rotary club will assist all crippled children in Craig county, according to Dr. F. M. Adams, chairman of the boys work committee of the club. Where the parents of crippled children cannot afford to give them surgical treatment and after an examination it is thought that such an operation would benefit the children, the club proposes to put them in a hospital for treatment.
The club will hold an open meeting June 14 at Hillcrest Country club.

REFORMS INVADE BEAUTY PARLORS

Sanitary Methods Now Prevail in Hair Dressing and Cosmetic Use

CHICAGO, June 2.—The hair-dressing parlor where the same comb and brush encountered many heads each day without even the formality of submission to soap and water is a thing of the past, according to Mrs. M. F. Baird of Chicago, a prominent member of the American Cosmeticians' association. Today's sanitation is the rule in an occupation to which 15 years ago it was a word without meaning. She, as a member of the association, has seen the primary highway to health has accompanied an increase in the number of hair-dressing and beauty parlors during the last 10 years. She added, of from 2,500 to approximately 10,000, exclusive of residential work done by 20,000 women, and the number is constantly increasing.

Organizations of persons engaged in hair-dressing and related work include, besides the American Cosmeticians' association, the National Hair-dressers' association, which will convene at St. Louis, July 31-August 2.

"Fifteen years ago," said Mrs. Baird, "the operators in hair-dressing did not know the meaning of the word sanitation. Women leaned forward over bowls to have their hair washed and perched up in barber chairs when they had a massage. The use of electricity was limited. Today sterilizers are found conspicuously displayed in every booth, antiseptics are used generously, and massage chairs that are suited for the work have been designed, while in shampooing many innovations have made it a comfort rather than a torture. Schools giving scientific training have been established and today in many states in the union there are efforts being made to have state laws passed that will put this work on an even higher standard."

"To this end the American Cosmeticians' association was formed. The founders designed to promote uniform legislation for the profession of cosmeticians, to provide methods of carrying on and systematizing the business of the membership, and to promote the development of the occupation."

The National Hair-dressers' association, according to its secretary, Mrs. A. F. McGroove of San Francisco, is organized to create styles in America in artistic and becoming hair dresses; to see that the best wigs, toupees, and the like, are made; to have milliners see the size of head dresses before making head sizes in hats; and in other ways to promote and elevate the business of hair dressing and hair work.

BUILDING BOOM ON AT SAPULPA

Prosperity Is Returning to Creek Capital

150 FINE NEW HOMES

First National Bank Will Have \$100,000 Home Very Shortly

Special to The World.
SAPULPA, June 3.—With building under way in all parts of both business and residential sections of this city, Sapulpa is enjoying one of her most progressive years in a constructive way. Her population is increasing rapidly, if reports from city officials' offices, pertaining to civic development, can be taken as any sort of criterion.
Approximately 150 new residences, many of an elaborate type, and all of which were erected and equipped in thoroughly modern manner, were built here during the year ending June 1. The building was not confined to any one residence district but covered all parts of the city where homes are located.

Many New Stores Built.
In the same period of time 25 new store buildings and business rooms were erected.
As winter ended building activity became more pronounced, despite the fact that it had already been above the usual mark for the preceding cold months. During May 12 residence permits were issued, together with a number of permits for various other structures. Total cash involved in May building was recorded at \$43,650.

In the downtown section, construction projects are particularly noticeable at the present time. These include a new \$100,000 home for the First National bank, to replace the former moderate structure which housed the institution and which was destroyed by fire last winter, at Dewey avenue and Main street.

Several New Churches.

On Lee avenue, just out of the business district, a new Christian church to cost \$50,000, is nearing completion. A new Presbyterian church building, to cost \$75,000, is also half-way ready for occupancy at the corner of Oak street and Lee avenue. A new \$10,000 Second Baptist church will be ready for use shortly.

Within the next few weeks work is scheduled to commence on \$125,000 worth of new schools and school building additions. The school board's program covers two new ward schools, of four rooms each, and a large addition to the Jefferson ward school. After these are completed, a new junior high school, to cost \$125,000 will be erected.
Much remodeling work is under way in connection with the city's feature building activity. The Y. W. C. A. building has already been remodeled to the extent of \$5,000. The Kroger store used a similar sum in remodeling.

The Allen lodge for Boy Scouts has a big place on the construction record. It is situated near the Big Dam lake and is one of the best and most completely equipped lodges for scouts in the southwest. In every way the lodge has been fitted to meet the requirements of boys' training and outdoor life, such as Boy Scouts are urged to undertake whenever possible.

Cleaning Up City.
Aiding greatly in Sapulpa's advancement, the chamber of commerce clean-up campaign has just ended and leaves the city in a better way.

ter why, as far as sanitation is concerned, than it has ever been. The drive began with the distribution of questionnaires covering all phases of the clean-up. Two thousand of these questionnaires were returned to the chamber of commerce May 17 and tended to speed up the campaign. One hundred and sixty loads of rubbish were taken out of the city and 40 barrels of lime distributed to eliminate germs.

The need of a tourist camp was recently stressed here and arrangements made to inaugurate such a place. Grounds were recently surveyed, after a five-year contract had been procured on a suitable tract of land. All brush and weeds were removed and the property was fenced and fitted to accommodate tourists who would seek such a site while motoring in this section. The camp is easily accessible to the city, has plenty of shade, good drainage and water. It is located on a public highway.

LAST OF BALLOONS MAKES A LANDING

CONTINUED FROM PAGE ONE.
quiring coal gas for balloons participating in the race barred him as a contestant.

Few Advantages in Peace.
Describing the peacetime advantage, he said the pilot could smoke, helium being nonflammable. The wartime advantage he said would result in the reduction of danger from enemy shells.

He covered about five hundred miles, he said, passing over Chicago, crossing the Mississippi above the mouth of the Illinois river, and the Missouri above St. Charles, Mo. His landing was about 425 miles from Milwaukee.

The bag for helium had been rushed to completion, he said, and leaked as a result, making it necessary to throw overboard 1,500 pounds of sandbags last Wednesday night. He started with 2,500 pounds and had 300 left at the end of his journey. Norfleck asserted he would have remained up last night, if the leak had not affected the bag. Early Thursday the bag passed over the home of his aide in Greene county, Illinois.

THINK LABOR IS A DEGRADATION

Teacher Had Trouble in Convincing Albanian Boys to the Contrary

TIRANA, Albania, June 2.—Work is a disgrace in Albania. One who is forced to it is immediately ranked as belonging to the lowest orders of Albanian society. As a result of this point of view, American teachers assigned to the American Red Cross vocational school here had first the task of teaching the 60 or more boys coming from the higher Albanian families that if they wished to learn any trade the idea of spurning the hammer and the saw must be dispelled from their young minds.

When the boys congregated for their lessons in the vocational they all refused to have anything to do with tools. They distained touching anything that bore evidence of work. They refused to use brushes to sweep out their dormitories. They looked at the chisel and mallet with repugnant eyes.

The American teachers met this puzzling situation in a practical way. They began using the tools themselves, freely and naturally and continued to demonstrate the value and importance of a tool to the workers until finally the passive resistance of the

Thinks Germs Killed Gov. Parkhurst

Gov. Frederick H. Parkhurst.

Mrs. Dorothy W. Parkhurst, of Bangor, Maine, widow of Gov. Frederick H. Parkhurst, of Maine, has entered suit against the Employers' Liability Assurance Corporation, Ltd., for \$7,500 on a policy held by her husband. She alleges her husband died of septic pneumonia brought on by diphtheria germs that, she declares, were introduced into his throat on a clinical thermometer used by physicians in examining him for a policy in another insurance company.

young Albanians was completely overcome and they came to use every implement in the shop.

Long centuries of caste had taught the boys that the real gentleman was he who lived in idleness. A few months in the school and the age-long tradition was practically wiped out. The boys now do all the work, including the care of their own rooms and waiting on the table of the school's faculty. The minds of these youths have been transformed and constant reference to the upward struggle of American captains of industry who achieved their success through work have imbued

each with such spirit of progress that the school, located in the midst of a slovenly, idle population, stands out in bold relief for its industry and zeal.
Improving Phone Service.
Special to The World.
WELSH, June 3.—The Welch Mutual Telephone company is making extensive improvements on its properties. New poles and cross-arms are being placed throughout the business district.
"The Maple Leaf Forever" is the national hymn of Canada.

Sand Springs

PARKS SUGGESTED FOR SAND SPRINGS

Civic Workers of Both Sexes Exchange Views

SAND SPRINGS, June 3.—The chamber of commerce speaker this week was well attended by both the chamber and women's club members. There was also a large attendance from Shady Grove Community club.

The first speaker was Mrs. DeSchauber, president of the Sand Springs Women's club, who gave an explanation of the work of the club. She also told some of the things that they had already accomplished and what they were now doing to benefit the city.

The second speaker was Mrs. Wygant of Tulsa, who gave an interesting address on what from her viewpoint as an outsider would be the Sand Springs. Her idea was that Sand Springs needs first small parks, or beauty spots, that help to make a town more home like. Along this line she mentioned the fact that it has on a stranger to come into town and see flowers, vines and grass around every home.

Mr. Stottmeyer, chairman of the Shady Grove Community club, gave a talk on the value of a chamber of commerce or as his organization is called, "Community club," to the surrounding community.

Mrs. Hawson the only woman on the Tulsa county free fair board explained what the board intended to do in the county fair and also told about the evolution of the township fair here from a small exhibit to what promises to be the best township fair in the state this year.

Crowd at Legion Round-up.
The American Legion round-up brought many of the country's greatest ropers and riders here during the round-up now on. Such well-known riders and ropers as Barton, Carter, Fred Benson, Eddie Burgess, Dock Purdie, Fred Lowry, Amos Partridge, J. H. Strickland, Ernest Wolly, Guy Shultz and several others are here, also such bulldoggers as Bill Pickett, Mike Robinson.

Some of the greatest and fastest roping and riding ever staged in the state is taking place here.

One of the biggest features is the bulldogging contests. Bulldogging is possibly the most hazardous of the western sports and certainly the most thrilling. Bill Pickett, the present world's champion will have plenty of competition in this event as the other entries are probably the foremost in the line.
The Ku-Klux Klan paid a visit to the Christian church last Sunday night. There were 10 men attired in full regalia. The spokesman explained the purposes of the Ku-Klux Klan. He also said their purpose was always to uphold the law and never to take the law into their own hands except in extreme cases, disappeared.

FULTON IS TO RESIGN

Assistant to Attorney-General Quits June 5 to Campaign for Justice of the Supreme Court.

OKLAHOMA CITY, June 3.—Elmer L. Fulton, assistant attorney-general, today filed his resignation with Attorney-General Short to become effective June 5. Fulton said beginning Monday he would start an active campaign in the interest of his candidacy for the democratic nomination for justice of the state supreme court.

In a letter to Short, Fulton said that he believed a public official who is a candidate for office, unless he is a candidate to succeed himself, should not campaign on the time belonging to the state, and therefore tendered his resignation.

POSTPONE MANY TRIALS

District Judge Fullerton Unwilling to Try Cases with Budget Empty.

MIAMI, June 3.—The depleted condition of the jury fund has necessitated the postponement of many important trials until the September term of district court, which begins Sept. 4, according to District Judge S. C. Fullerton. It is stated that the funds now on hand are only sufficient to take care of the Wood murder case and a civil case now on trial.

VISIBLE VOTERS FORMED

Special to The World.

ADA, Jan. 3.—A body to be known as the Visible Voters league was organized here last night when a number of citizens met at the city hall.
The purpose of the organization "is to combat secret organizations who are endeavoring to get in control of the government." Open attacks by the speakers at the meeting were made on the Ku-Klux Klan.
